## **Canada’s Moral Obligation to the World**

As billions of people in developing countries demand more of everything, especially cheap energy, Canada can help meet the need and improve the global environment by exporting liquefied natural gas (LNG). So why are some Canadians trying to thwart the idea, insisting we fight climate change all by ourselves? Not only would this further hobble our economy but exporting LNG represents the much stronger environmental and moral case.

## **Despite cabinet tweaks, Trudeau is planning more of the same**

Patty Hajdu is out as health minister, Harjit Sajjan is gone from defence, and Bill Blair has lost his public safety portfolio – but all three remain in cabinet. Despite changes in Justin Trudeau’s cabinet, it’s clear the government is not interested in a course correction, but rather more of what they were doing before the election, True North’s Andrew Lawton predicts.

## **Liberals want to rush censorship law Bill C-10 back into parliament**

“We promised to bring in some bills very quickly. C-10 is one of them,” said Rodriguez after being sworn in. The law, which proposes to update Canada’s Broadcasting Act to meet the current digital media landscape, has been cited by many experts as a threat to Canadians’ right to freedom of expression. In response to criticism, former Canadian Heritage minister Steven Guilbeault referred to those who opposed the law as “extremists

## **Trudeau appoints an environmental radical as environment minister**

If you thought Catherine McKenna was divisive as environment minister, wait until you see what Steven Guilbeault has planned for this file. As a former Greenpeace activist who illegally scaled the CN Tower, Guilbeault truly believes in the cause of fighting climate change – and Prime Minister Justin Trudeau is well-aware of this.

## **Government overreach on COVID measures has been about power — not the pandemic**

For nearly six months, Dr. Bonnie Henry simply abolished religious liberty in British Columbia. Her edict permitted people to meet for an Alcoholics Anonymous meeting in the church basement, but that same number of people could not meet in the much larger church to pray. It wasn't about regulating meetings, but banning worship.

## **Justice Centre sues Ontario Government over vaccine passport**

"The Ontario vaccine passport itself is an instrument of coercion that pressures individuals to submit to a medical intervention, contrary to their will and their own best judgment," adds Mr. Pineda. "Not only is this ethically wrong, it is also illegal. When we get before the Court, we will be urging that they see these vaccine mandates for what they really do – which is take away the long-standing rights of citizens to make informed decisions about their own medical care."

## **Justin Trudeau wants a "just transition" away from Canada's energy sector**

As Justin Trudeau's government seeks to "decarbonize" Canadian industry, the Liberals are advancing what they call a "just transition" devoted to "helping workers and communities thrive in a net-zero carbon economy." While it sounds noble, it's an initiative based on the idea of phasing out jobs in Canada's oil and gas sector. Moreover, it neglects to recognize the work being done by the energy industry, such as investing in carbon capture and storage, which reduce emissions without punitive carbon taxes.

## **British Columbia's Vaccine Passport Policy is the Worst in Canada**

"Passports please." An experience once limited to crossing international borders has become an everyday occurrence at restaurants, arenas, gyms and countless other venues as Canadians must prove they are vaccinated to gain entry. But what about individuals who, for legitimate medical reasons, cannot take the risk of getting two jabs? Mustering compelling real-life examples, Christine Van Geyn reveals the checkerboard of provincial vaxxport policies and calls on governments to respect the need for accommodation as well as the sanctity of the patient-physician relationship.

## **Support grows for brave Mounties fighting vaccinations**

To date, 45,000 people from the group Mounties for Freedom have signed an open letter to RCMP Commissioner Brenda Lucki protesting mandatory vaccines. Mounties for Freedom clearly states its mission to oppose the "crimes against humanity" mandatory COVID-19 vaccines and vaccine passports pose. It parallels what the federal government is doing to Canadians, to domestic abuse, which is "centered around power" and "physical, financial and emotional control."

## **Vaccine passes are a road to global surveillance says former privacy commissioner**

Ontario's former information and privacy commissioner Dr. Ann Cavoukian is raising the alarm about the potential for vaccine passes to be used by

governments to spy on their citizens. "This kind of data gathering will create a "global digital infrastructure of surveillance" which is constantly being updated by "hundreds and thousands of sites that are obtaining these vaccine passports from you. With vaccine passports, people are being forced, they're demanded to reveal their vaccine status. And that should be no one's business except for the individual and their own doctor".

## **Vancouver Rallies Highlight Opposition to Vaccine Mandates, Unfair Media Coverage**

Tanya, Gaw, founder of the Action4Canada movement, generated some of the loudest cheers when she spoke passionately about standing up for Canadians' rights. "No doctor or provincial legislation can pretend that any measure can override the charter or other constitutional rights," she said. "[B.C. Provincial Health Officer] Bonnie Henry has no power to be doing what she's doing." "We need warriors," Gaw continued, "because the government has waged war against us."

## **Quebec is the Evelyn Mulwray of Canada**

Quebec is the Evelyn Mulwray of Canadian politics and, like the Faye Dunaway character of Chinatown, can't make up its mind. Now, with Bill 96, the wizardry is being stretched to its limits because Quebec, in attempting to amend the constitution is pencilling in for itself even more powers that will define it as a nation. But I can assure you that this will not include exempting itself from the ability to temporarily transform itself into a province once a year so that the incredible boon that is equalization can still be enjoyed.

## **To Enhance Our Standard Of Living, Citizens Will Increasingly Need To Bypass 'Our' Governments**

Rather than seeing government as something that has emerged from the people to represent the people, many Canadians now rightfully see the government as a force that imposes upon and often oppresses individuals who don't adhere to the ever-changing whims of those in power. But many have still not woken up to this fact.

### **C3RF Update 29 October 2021**

This week's update connects the past with the present and offers evidence that some things just don't change. In this case it is the insuperable desire of good men and women to pursue their own life plans absent busybody, government intervention. As we saw the Pilgrims and Huguenots of past centuries leave oppressive states for freer frontiers, so we see present day Canadians fleeing their draconian homeland. As for those citizens who are no longer free to escape, like their East German counterparts, we see the development of underground agencies and relationships designed to cut off government control and oversight.

### **Major Russ Cooper (Ret'd) "In Hot" with Angelina Ireland, Delta Hospice Society**

Besides the "update", a complementary C3RF "In Hot" video interview with Angelina Ireland is offered to illustrate this last point. Angelina is the President of the Board of Directors of the Delta Hospice Society and is seeking to establish a non-MAiD, palliative care network of sanctuaries that is removed from government mandates. It's no easy task as she is swimming upstream against a "culture of death" narrative in a country that is anything but diverse, inclusive or equitable.

The first priority of the Canadian Covid Care Alliance is to promote the prevention and early treatment of COVID-19. The success of this petition will demonstrate to the Canadian Government the widespread support among citizens and medical practitioners across the country for this safe and inexpensive medicine, which has been used with tremendous success to treat thousands of COVID-19 patients across the world.

## **BeagleGate Strikes Fauci**

Where better to torture dogs than in a North African nation which has no qualms about torturing dogs. After all, canines are not favored by the

Islamic religion. So where better to capture these dogs, cut out their vocal cords – yes, the “researchers” did that, but only because their barking and howling “disturbed” the researchers – then torture them to death. All in the name of “science,” they forced these darling young pups to endure agonizing deaths.

## The NIH isn't just torturing beagles

Our government is out of control. Whether it's beagles in Tunisia, monkeys in California, children in public schools, or people whose lives are being destroyed over an experimental gene-manipulative vaccine that leaves them contagious and vulnerable to COVID variants, the federal government is using its unconstrained power to bring about fear, suffering, and even death.

## Anthony Fauci belongs in prison

Here is the problem. Americans still naively believe the United States of America operates with its founding ethical principles in medicine and politics – it doesn't. Fauci is no better than Mengele, and Biden's regime is no better than its communist puppet-master, Chairman Xi Jinping. Social and medical policies derived from the communist collectivist model are unethical, un-American, lawless, and tyrannical.

## **Merchants of Death**

Many eminent scientists, physicians, nurses and advocates either have had their microphones disconnected, their positions stripped away, or they were relegated to being conspiracy theorists. As a result, Americans everywhere have been denied their right to a second opinion. But, truth always finds a way to rise to the top. We will reconnect some of the most eminent of these - Dr. Peter McCullough, Dr. Robert Malone, Dr. Michael Yeadon, Dr. Vladimir Zelenko and Robert F. Kennedy, Jr., and listen to what they have to say.

## **Mass Psychosis Is A Real Global Pandemic**

Mass psychosis is defined as “an epidemic of madness” that occurs when a “large portion of society loses touch with reality and descends into delusions.” The witch trials of the 16th and 17th centuries are a classic example. We’re now in the middle of another mass psychosis, induced by relentless fearmongering coupled with data suppression and intimidation tactics of all kinds.

## **Moral Objections to the Current Vaccines**

Beyond the ineffectiveness of the vaccine either to prevent the acquisition or transmission of the virus, beyond the governmental overreach; even beyond the side-effects and numerous deaths, my primary objection is one of morality. I simply cannot and will not knowingly use any product that was developed, proved, or processed on or by cells from aborted fetuses. My conscience will not allow it, no matter how much it is supposed to benefit me or others.

## **The murdered infant comes to the virology lab; the ivory tower is befouled**

It never occurred to me, until now, that some of these human cells in the soup in the lab came from infants, taken from the mother's womb alive, for harvesting, who were then killed. Out of the virological research fraud and infant murder come THE VACCINES, including the COVID vaccines, which are causing huge numbers of injuries and deaths across the world. This completes a circle of evil. People of faith everywhere must see that declaring a religious exemption from the shots is a DUTY, whether or not the authorities allow the exemption.

## **Vaccine Mandates Backfire on Employers**

There is a sizable segment of the population who will not get vaccinated under any circumstances. While figures such as five percent or ten percent sound small, they amount to hundreds of thousands of workers across the country. Employers in both the private and public sectors need to face reality and make plans to accommodate workers to choose not to be vaccinated.

## **Police Caught in the Middle**

As two weeks to flatten the curve turned to two years of lockdowns, the populace is getting cranky and less compliant. The public narrative on Covid is shifting with each passing week with new revelations. The legal and moral landscape two years from now will be different. Gross errors in public policy will be laid bare. Will politicians and news media step up and accept responsibility? No, they will look for scapegoats, and blame always flows downhill. Police should consider where they might fit in this blame game?

## 2018 EU Already Planned Vaccination Certificates, Monitoring Vaccine Status, Combating Hesitancy

In 2018, a year before the coronavirus outbreak, the European Commission released a document already addressing plans to 'combat vaccination hesitancy,' monitoring citizens' vaccination status, squashing vaccine dissent, and European vaccination certificates. The document, dated April 26, 2018, lays forth challenges that their future vaccination programs will face, from distrust, fear of vaccine side effects, "reducing vaccine reluctance" to "disinformation" campaigns. The EU even addresses issues that might arise during "innovative" vaccine's pre-licensing phase.

# FREEDOM OF SPEECH

## Freedom Has Priority Over Safety

Common experience does not support the notion that safety is preferable to liberty. People are noted to take great risks, including risking their lives, to flee oppressive regimes. There are constitutional protections for liberty interests such as privacy and due process, even though those protections

may be accompanied by risks to public safety. History is full of examples of people who risked and gave their lives, both in pursuit of and in defense of freedom.

## **COP26 & The Great Reset: The Not So Glorious Prospect of Owning Nothing and Passing a Cold, Dark Winter**

The reason for the panic is because, in case you have been living in some bunker underground, we are in the midst of a very serious energy crisis along with hyperinflation, and there are growing murmurings that the very policies that COP26 wants to maximize to full throttle at this conference, *are at the very source of what is causing this energy crisis.*

## **Solar Waste Concerns**

Environmentalists' bright promises of utilizing solar energy to power the world are darkening quickly as it becomes clear how much dangerous trash is generated with tons of old panels being discarded in landfill sites. The millions of solar panels headed for landfill are a veritable toxic cocktail of gallium arsenide, tellurium, silver, crystalline silicon, lead, cadmium, and heavy earth metals. As solar panels sit in dumps, the toxic metals they contain can leach out into the environment and possibly pose a public health hazard if they get into the groundwater supply." <sup>5</sup>

To even attend the WEF annual meeting, you must be privately invited or a member of WEF, which costs \$60,000 to \$600,000. The attendance badge for the meeting is extra and costs another \$27,000 in 2020, just to get entrance to the conference. The irony was palpable at Davos 2020, which brought in a “steady stream” of private planes and helicopters so their passengers could discuss the climate crisis and sustainability.<sup>4</sup> In 2018, more than 1,000 private jets and helicopters similarly made their way to Davos and, in 2017, an estimated 200 private flights landed in the city each day during the event.<sup>5</sup>

# **BLM AND ANTIFA**

## **The Truth Behind Black Lives Matter**

In this episode of Counterculture with Danielle D’Souza Gill, Danielle exposes the truth behind Black Lives Matter (BLM)—the organization, their mission, and the carnage they wreaked on cities throughout the summer of 2020. While BLM and the left-wing media described the riots as “peaceful protests,” this was clearly not rooted in reality. Danielle interviews author David Horowitz about his research and findings on this topic. Horowitz presents us with the data and facts, showing that almost all of the BLM protests were rooted in violence.

## **Grant Napear's Life Matters**

Coast-to-coast riots caused nearly \$2 billion in damages and cost scores of lives — all under the guise of "social justice" and "peaceful protest," of course. Those who dared stray from BLM orthodoxy — no joking allowed, no defense of law enforcement allowed, nothing less than full and immediate genuflection to the vengeful gods of "diversity" allowed — faced moral condemnation, social media persecution and even employment termination. Napear suffered all three punishments. His crime? In response to NBA player DeMarcus Cousins' tweet to him asking "what's your take on BLM?" the veteran sports journalist answered with those fateful six words: "ALL LIVES MATTER...EVERY SINGLE ONE."

## **ISLAMISM**

### **Progressives are a gift to Islamism**

The West is evil, home to foundational structures that serve only the white, heterosexual, male oppressor. So when the Islamists come along and say that Allah has given you a higher purpose, one that will culminate with ending the wickedness of the West, young British Muslims are already half-way there. Hatred for their country is all they know. That's how a 22-year-old man can be driven to carry out a suicide bomb attack at a concert largely attended by children. Or how two men in their twenties can become inspired to behead an off-duty British soldier in broad daylight. Or how three teenage girls from East London can be coaxed into joining Isis.

### **David Amess and the terrorism amnesia industry**

We seem to be witnessing the cranking into action of the Islamist terror amnesia industry. This is the means through which, subtly and sometimes imperceptibly, memorialisation of lives lost to suspected Islamist terror is discouraged. Where the politics is drained from such outrages and we are pressured to view them less as violent expressions of a particular ideology and more as sad, unpleasant events. As occasions for grief, not anger; for

fleeting reflection, not societal interrogation. This happens after every suspected Islamist attack.

## **The myth of lone-wolf terrorism**

Lone wolves do not come out of nowhere. They are inspired by other radicals and they are noticed by their community. The problem is that the community then keeps quiet. A similar fallacy looms over our understanding of online radicalisation, which does not occur in a silo, between the individual and their computer screen. The individual has to be susceptible, in a place of vulnerability, where Islamic radicalism can easily set in.

### Saint Jacinda's halo has slipped

Jacinda Ardern's halo has slipped. After the failure of lockdown measures to stop the spread of the Delta variant earlier this autumn, Ardern has now announced a vaccine mandate. During a press conference last week, a journalist said that this sounded like Ardern was creating 'two different classes of people', the 'vaccinated [and the] unvaccinated'. Yes, Ardern responded, 'that is what it is'. 'If you are still unvaccinated', Ardern continued, 'not only will you be more at risk of catching Covid-19, but many of the freedoms others enjoy will be out of reach'.

## High Stakes in Virginia

Many Virginia parents are outraged by the "woke" propaganda their children are being subjected to in the public schools — and the governor has sided with the education bureaucrats and the teachers union. ## Texas governor tells UN to go 'pound sand'

What's really edifying here are not just the facts on the ground as well as Texas's experience — it's that Texas has a governor with the *cojones* to stand up to this petty micromanaging from these claptrap bureaucrats. He sees right through them, and his short, pithy statement about where the U.N. can put it is music to the ears of everyone out there who understands energy production. Not only is Obama the most un-American man in America, he may also be the most dangerous man on the planet. The record of history is very clear, and very consistent. ## **The Statement 'Everything Is Racist' Is Racist**

If we don't seek to stop division, it will never be stopped. So the next time someone says something you perceive as mean or unfair, or cuts you off in traffic, or you lose out on a job or a table at a restaurant to someone else who happens to be of a different ethnicity, religion, sex, etc., you can throw yourself a pity party; call up the ACLU, NAACP, and whatever other acronym you can think of; and sue everyone in sight over the great tragedy — or you can think.

## **Hell Hath No Fury**

Today, the mothers of America's schoolchildren are now telling the powers-that-be that they will not allow their children to ingest the toxic, dishonest, racist brew of CRT. They are telling the innovators of this theory, the teachers who purvey it, the Attorney General of the United States, the FBI,

and the President of the United States: Don't contaminate my child with your hateful, racist, anti-American, anti-White poison.... or else!

## **Stay Strong, The Sky is Not Falling, World 'Leaders' Are**

Leaders and activists have been lying to the people of the world for decades. They lied about the pandemic that would kill millions. They are lying about global warming/climate change being the next pandemic killing off human life. Their scare mongering is now going to focus on global warming/climate change, the UN's IPCC Report having labelled global warming as a "code red for humanity" God Bless all little people struggling through everyday life through mandates their governments are forcing upon them.
